*Copy & Paste the letter below or use it to help frame your submission to the Minister:*

To the honourable Paul Scully, Minister for Planning & Public Spaces

We kindly request you URGENTLY revoke the decision to approve a housing development at the 'Wallum' site situated at 15 Torakina Road Brunswick Heads (DA 2021/575). Bulldozers are imminent as Byron Council have approved a construction certificate on 8 February 2024.

Since your department were the consent authority for this development through the NRPP in May 2023 and previously in 2013 as a concept plan, your department has the authority and power to revoke such a poor planning decision. The proponent will be in breach of matters of national environmental significance and will be reported accordingly if you allow this unsustainable housing development to occur on culturally significant and nationally threatened species and habitats.

We the community strongly oppose this 'Zombie DA' and request you revoke the decision, rezone the wallum site as environmental conservation or refer the matter to the Federal Environment Minister for assessment under the EPBC Act. We will not stop until this pristine biodiverse coastal swamp heathland with numerous threatened species is protected from inappropriate development.
